West April

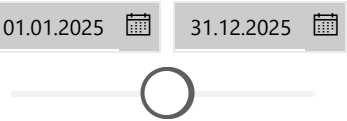

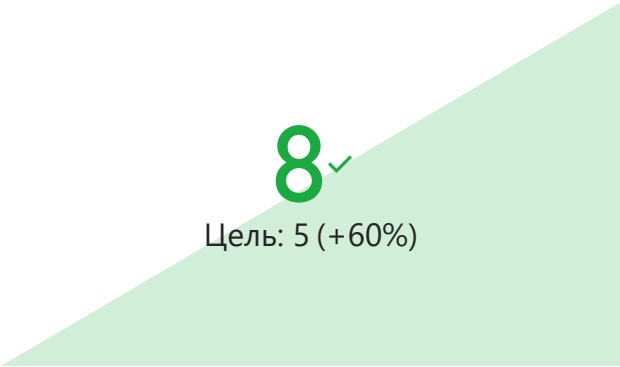

Revenue per night

destination name	revenue per day	day sum	total revenue	agency commission
Andersontown	\$2 077	1	\$2 077	\$415
East Carlshire	\$918	5	\$4 588	\$918
Hollandmouth	\$3 366	1	\$3 366	\$673
South Dana	\$942	18	\$8 479	\$1 696
South Nicole	\$433	11	\$4 763	\$953
West April	\$209	6	\$1 253	\$251
West Brett	\$1 981	2	\$3 961	\$792

Revenue for a current vs previous year

Bookings quantity for a current vs previous year

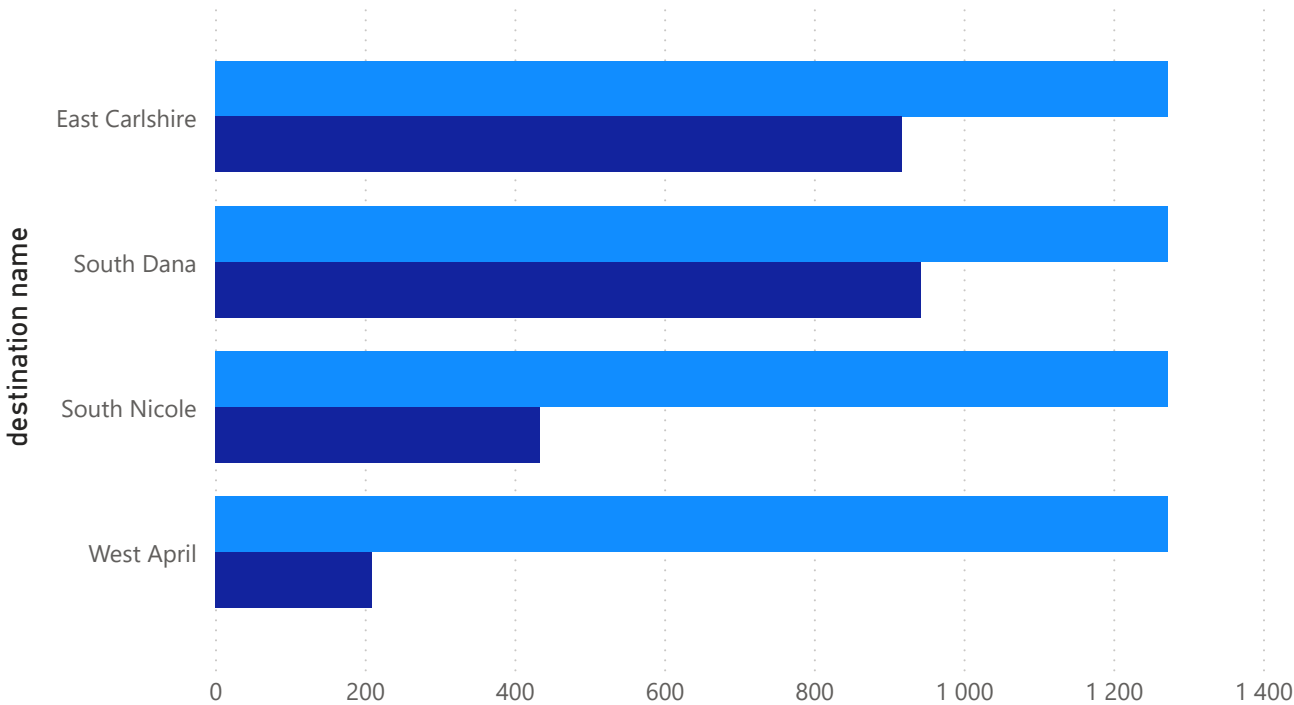

Destination category Historical has the highest score both in bookings quantity and total budget spent for bookings.

Despite that, the highest budget spent per day value belongs to Urban and Wildlife destination categories. Based on that data we can highlight the least and the most profitable destinations.

For example, although West Brett has **3 times less bookings** compared to West April in the current year, it brings about **3.3 times more revenue** due too higher budget spent per day and therefore considered more profitable.

Target revenue per day if value is less than average

● Среднее значение average revenue per day ● Сумма revenue per day

Years to increase revenue per day to average (10% growth per year)

West April		
\$208,83	\$1 272	19,00
revenue per day	avg revenue per day	years needed

South Nicole		
\$433,00	\$1 272	12,00
revenue per day	avg revenue per day	years needed

South Dana		
\$471,06	\$1 272	11,00
revenue per day	avg revenue per day	years needed

East Carlshire		
\$917,60	\$1 272	4,00
revenue per day	avg revenue per day	years needed

It will take up to 16 years for a Destination with least revenue per day to get to average. Increase of this value will also affect totall revenue.

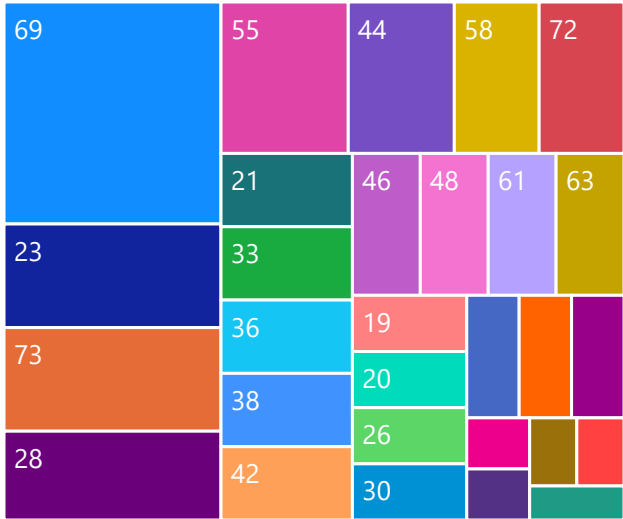

For example, West April with the same bookings quantity and with average revenue per day will make **4.6 times** more budget.

Year budget vs Potential year budget

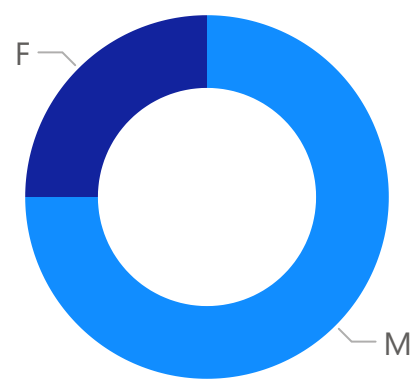

West April	
\$1 253	\$7 633
year revenue	potential year revenue

South Nicole	
\$4 763	\$13 994
year revenue	potential year revenue

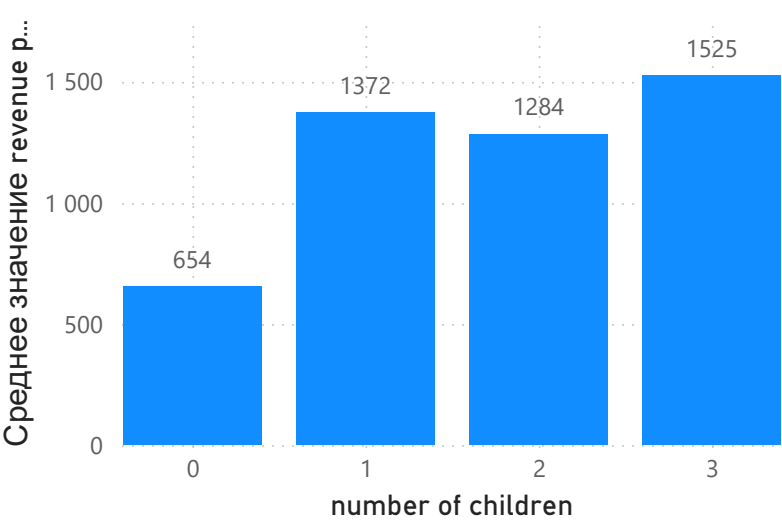

Bookings quantity by age

Bookings quantity by sex

Average revenue per day by number of children
